DETAILED ACTION

Information Disclosure Statement

The listing of references in the specification (paragraph [0011]) is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

Figures 9 and 10 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because the abstract should be in the form of a single paragraph of no more than 150 word or 15 lines. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: the reference to “patent documents” in paragraphs [0005] and [0006] is informal, rather the actual document referred to should be cited.

Appropriate correction is required.

Claim Objections

Claims 1-10 are objected to because of the following informalities: both claims 1 and 2 contain the term “a flame on which the slide brick is mounted”. However, a flame cannot be employed as a mount. It was assumed for examination purposes, that this term was intended to read “a frame”.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshihara. Yoshihara teaches a “molten metal quantity control device” in the form of a rotary nozzle system including a fixed plate, slide plate, collector nozzle, frame, outer race and control and

manipulation means including a pivotable hinge, as showing in the embodiments of figures 1a, 2b and 3 for example, showing all aspects of the above claims.
